## Message From Chairman's Pen

As I bask into the grandeur of all the years that Genius Group has been in existence, what comes to my mind is that –

**"Success comes to those who work hard and stays with those,  
who don't rest on the laurels of the past."**

It is very much apparent that we live today in a world that is so very different from the one we grew up in, the one we were educated in. Change in today's world is riding at an accelerated pace and we need to pause and reflect on the entire education system. I firmly believe that students must be taught how to think, not what to think. That reminds me of the great words of wisdom by Aristotle, "Educating the mind without educating the heart is no education at all." As we impart education to match the advancement of technology and globalization, we march our children ahead with the ethos of moral and ethical principles.

We, fortunately, have committed and supportive management, dedicated teachers, and caring and cooperative parents, which blend harmoniously to create a child-centric school that I am sure will enable our pupils to think, create and unfold the magic of ecstatic imaginations.

## From The Editor's Desk

**OUR DREAMS HAVE TO BE BIGGER  
OUR AMBITIONS SOARING HIGH,  
OUR COMMITMENT SHOULD BE DEEPER  
AND OUR EFFORTS TO TOUCH THE SKY**

As we are in mid of this session on a satisfying note, we need to gear up for the challenge lying ahead which is to keep intact the air of excellence that surrounds our elite institution.

As time is changing, education needs to be seen with new eyes, free from the baggage of yesterday's characterization. My vision is to develop a school that encourages creative and free thinking where a child is free to ask fundamental questions, enquire and learn. Where an atmosphere of space, freedom, care and security is created in which children are helped to enlarge their horizons. The teachers are concerned with the developing individual talent and intelligence of each child and not merely a few. We should be aware of a child's talent as well as limitations and allow him to develop in his own way and not on the basis of predetermined expectations.

It is our endeavor and an effort towards creating a wider awareness of the world and giving space for multidimensional development of the students as well as teachers. I hope students passing out from Genius Group of Schools would grow into self-aware, sensitive, and responsible human beings who remain lifelong learners.
